Abstract

NanoComposix Europe is the official distributor of nanoparticles in Europe. NanoComposix specializes in the fabrication, characterization, and integration of nanomaterials into products and systems. Our nanoparticle library consists of over 300 variants of nps - silver, gold, platinum, silica and magnetite with different size, shape and surface. Our mission is to enable our customers to maximize the potential benefits of nanotechnology through the use of precisely engineered, highly characterized nanomaterials. We can modify our standard products - size, capping ligands, concentration or develop new desired materials.

Keywords: Nanoparticles
